Aditya Kumar

Software Engineer at IDEMIA
East Delhi, Delhi, India

Summary

Software Engineer. Developing effective, high-quality software
solutions. Quickly learning new technologies and frameworks.

I have acquired decent technical skills with various programming
tools, software packages and hands-on hardware experience that
make me a really productive asset for any organization.

With my analytical approach and reasoning, I am capable of
breaking down any real-world problem into simple logical issues
and address them one by one to build a robust solution for the real
problem.

If you have something interesting to talk about or just banter, Contact
me at akmldt@gmail.com

Experience

IDEMIA

9 months

Software Engineer
January 2019 - Present
Noida Area, India

• Trusted Fan Experience, US based Project : Working with a team here
at IDEMIA to leverage the Secure Identity Credentialing and Biometric
technologies to remove friction points from both the Fan and Worker
Experience on Event day. The solution is being built on MicroServices based
architecture using JAVA Spring framework. Frontend is being developed in
Angular.

• Developed an OTP based User Verification module : Involved in developing
the backend for user phone number verification system using OTP. For this,
JAVA Spring framework was used with REDIS database.

Associate Software Engineer
July 2018 - December 2018 (6 months)
Noida Area, India

• Candidate Hiring Portal for IDEMIA Internal Use : Candidate Interview
Journey tracker from Interview call to final offer letter was developed.
• It is able to parse the resume to ease the process of fllling up the form,
Interviewer can give feedback, generate new requirement request, and track
down the candidate status.
• The Portal was build using Java Spring-Boot framework with MYSQL
database. Frontend was designed on Angular 6. I have worked on both
backend and frontend.

SquadRun, Inc
Data Analyst Intern
December 2016 - March 2017 (4 months)
Noida

• Worked on process automation, development, and execution for
categorization and cataloguing of beauty and hygiene products for Sephora, a
French luxury cosmetic company, a client of Squadrun.

• Handled operations, Supply management, and Quality assurance for the
project as well,
successfully delivering the work with high-quality output.

• Automated a major percentage of the work using Visual Studio scripts for Ms
Excel and Google Scripts for Google Spreadsheets.

StarChef
Intern
May 2016 - July 2016 (3 months)
Panchkula

• Worked at a online food delivery startup sourcing its product from home-
based experienced chefs. Got a chance of experiencing the struggle and
excitement building a startup from ground-up.

• Worked in Market Research, Business Development, Marketing Strategy,
Social Media
Campaigns, Chef Recruitment, Menu Management, Managing Operations,
Customer Support, Graphics and UI Designing.

• This internship grew me as an efficient team worker and through this, I developed great interpersonal skills with knowledge in multiple disciplines.
